

EXPERIENCES

Web Development

- Voluntarily converted Apogee Physician's static newsletter site to dynamic WordPress website and avoided repetitious c/p coding as well as largely improved efficiency by taking the advantage of WordPress plugins.

- Redesigned the entire website of Apogee Physicians by prototyping, making colored comps and interactive demo, reducing current 26 webpages to 9 to avoid being overwhelmed by text from the current website. (still waiting to go live)

- Gained experiences in talking to clients, creating contracts, etc by developing websites as a freelancer.

JavaScript

- Coded a dice rolling game involving 2 players playing in rounds with 2 dices. The rules are:
 - » A player can roll the dices many times and each result gets added to his ROUND score, but he will lose the round score if one of the dices is '1', and it's the next player's turn.
 - » He can choose to 'Hold' which means that his round score gets added to his GLOBAL score, and it's the other player's turn.
 - » The player will lose the ENTIRE score if he rolls two '6' in a row.
 - » Players can set the winning score themselves and whoever reaches the score first wins.

- Coded a budget web application which users can add/delete income and expense items, and the total income, expenses as well as the available budget is calculated and displayed.

- Coded a simple web piano project consisting of audio files and DOM event handlers that users can click on each key to play the sound of a piece of melody.

- Created a web alarm clock that shows current time, date (m/day/year) and day of the week, and the screen changes with music playing when it is the set time .

React & Redux

- Coded a weather forecast app allowing users to enter cities name to check the map, temperature, humidity and pressure of the city; users can add as many cities as they want. This was achieved by redux middleware and promise, as well as AJAX and Google Maps API.

- Created a youtube mockup web application using React with real Youtube API that when users type in the search bar, the video list on the right automatically updated on the fly, and the video that the user clicked will be automatically played.

- Coded a simple book list app using Redux managing application state that users can click a book from the book list containing several books, and the details of the book (title, author, etc.) will be displayed.

Other

- Came to the United States at the age of 15, completed High School and basic College credits at community college, graduated with Distinction by the age of 20 from University of Michigan with a B.A. degree (However, I am a true believer in efforts than in personal talents!).

DESIGN SKILLS

01 Computer

Adobe Photoshop
Adobe Illustrator
Adobe Premiere
HTML & CSS
Javascript & JQuery
WordPress
Bootstrap
PHP
MySQL
API

02 Knowledge

Grid & Layout.
Color theory knowledge.
Image editing.
Web usability.
Interface Design.
Google Analytics & SEO.

LANGUAGE SKILLS

EDUCATION

From May 2015 to present.

Wordpress Development and JS Programming
Udemy | CodeFights | "You Don't Know JS". Online

From September 2013 to May 2015.

Website Design (Self-teaching)
University of Michigan. Ann Arbor

From September 2013 to May 2015.

Psychology *University Honors*
University of Michigan. Ann Arbor

From September 2010 to May 2013.

Phi Theta Kappa Society Honors
Green River College. WA

WORK HISTORY

Apogee Physicians™ 09/2016 - 10/2017

- Converted every page of newsletter website from static HTML to a dynamic WordPress site while still maintained the same appearance using PHP. This automated entire updating process and also took advantage of powerful Wordpress plugins to improve both efficiency and user interface.

- Redesigned all the pages of the new website to be user-friendly. This is achieved by reducing a huge amount of unnecessary pages and text from current website using functions such as dropdown menu, search and filtering, accordion etc, besides better grouping of text information.

- Gained experience in Shopify by recreating Apogee Store and uploading company's products.

Liren Design (Freelance) virtual

- Demonstrated organization skills by conversing with clients, creating contracts, designing and developing websites.

- Ensured mutual understanding by talking with/emailing to clients during the workflow.

- Actively in charged of SEO performances and user experience fixes after websites went live.

Rutan Productions 05/2015 - 09/2016 (part-time)

- Promoted sales by designing simple and pleasing web graphics and updated web content in time.

- Increased company's clients by creating short promotional videos/motion graphics.

- Enhanced photos with color correction, fixes and fine-tuning, allowing clients to receive preferable testimonials.
